

WARNING
The stove fan will get very hot when in use.

SPECIFICATION

Motor type	TEG
Weight (Kg)	0.78
Min operating temp	85 °C
Max operating temp	345 °C

Correct Usage
Pole Star Products Stove Fans are designed for use on stoves with normal surface temperatures between 200 C to 345 C (400 F to 650 F). Temperatures above the stated values may damage the motor.
Heat sensitive bi-metallic strips will tilt the fan as the stove heats up. A small gap of around 2mm is normal but a larger gap of 5mm or above means the stove is too hot.
